JK Search on the Workstation

- The JKCS Search is a web like browser providing on line, on demand access to all TM's located on the JKCS server.
- JKCS Search provides a multiple criteria search capability
 - Manual Number
 - Manual Title
 - Platform
 - Recent Updates
- TMs are updated automatically while in port and by CD for Shipboard Users

NOTE: The lack of bandwidth for use of shipboard JKCS servers results in an extremely slow process to download tech manuals while deployed. Current policy states that deployed units will receive CDs updates via mail once a month. The JATDI Program Office continues to research solutions to improve delivery methods and decrease time for receipt of CDs. **DO NOT ATTEMPT TO CONNECT JKCS TO THE WEBSITE TO DOWNLOAD TECH MANUALS WHILE DEPLOYED.**

Search Results

With the criteria entered in the search field(s), the JK Search Results page will display successful matches.

The arrow keys at the bottom of each Results page allow for paging forward and backward through the results.

The lower left-hand corner of the Results page shows the current results page number and the total number of pages of results.
